

QC-508B1 Material Testing Machine

Description:

It's new type material testing machine which applied by latest design and producing skill to have strong structure and lightweight, with precise ball screw, high sensitive load cell and functionally controller. Undoubtedly we still keep the advantage for testing precision, simply operation, expand strong. It's the best choice for material testing machine.

Specification:

1. Model: QC-508B1
2. Capacity : 500kg (MAX)
3. Force Resolution : 1/10000
4. Stroke : 800mm.
5. Stroke Resolution : 5/1000mm
6. Speed : 1--1000 mm/min
7. Space : Ø140mm
8. Dimension : 50X53X145 CM
9. Weight : 80kg
10. Power : 220VAC

Function:

1. able proceed tensile, compression force, peeling, tearing testing
2. able display force value and changed sharp value.
3. has metric and inch system inside and changeable
4. with a servo motor, this machine could set up testing speed directly.
5. set up completed to push start button and machine start testing proceed automatic
6. when testing completed, machine return automatic
7. quick-release adaptor match with various grips
8. easy operation by single push button and language option.
9. able connect with printer directly and output form
10. able connect with computer to proceed control, data analysis, etc.(option).
