

Electronic Densimeter EW-300SG

- For measuring specific gravity of rubber, plastics, metals, and much more
- Density resolution: 0.01g/cm³
- A general-purpose new densimeter with high accuracy and additional advanced features
- Simple & convenient operation by placing the sample on top of the container, and then in the water container.

Features:

- Simple operation by placing the sample on the container and then into the water
- Measuring range increased up to 300g
- Solid density and Volume can be conveniently measured
- Temperature can be compensated & adjusted to optional temperature
- Comparator function is available with buzzer sound (option).
- Large and floating samples can be easily measured with the new larger rectangular container and water tank
- Samples floating in water can also be measured
- Ethanol can be used as a liquid medium with improved standard water tank made with Styrol.
- Interface is included as standard accessories.

Specifications of Electronic Densimeter EW-300SG

Product Name	Electronic Densimeter EW-300SG
Measuring Range	0.01g/cm ³
Instrumental Error	±0.01 grams
Necessary weight for weigh density	0.5~300g
Function	Density, Volume, Comparator, temperature Correction
Measurement Result	Solid Density & Volume
Weight / Dimension	1.6kg/(L) 218X(W) 190X(H) 170mm
Power Supply	AC115~240V
Accessories	Tweezers Thermometer, 200gram Weight AC Adaptor, Steel Angle, Inter Face
Option	Printer (AD-8121B), Printer cord Liquid Density kit
